

VAAGESWARI COLLEGE OF ENGINEERING

Beside L.M.D Police Station, Ramakrishna Colony, Thimmapur, Karimnagar
(Approved by AICTE New Delhi & Affiliated to JNTU Hyderabad)

Date: 30/10/2021

To
The Principal,
Vaageswari College of Engineering,
Karimnagar.

Subject: Request Proposal to Conduct Five day FDP on “Internet of Things and Artificial Intelligence Applications”-Reg.

Respected Sir,

In Accordance to Subject cited above I, Head of the Department of Computer Science Engineering here with request with this letter to permit us to conduct a Five day Faculty Development Program on “Internet of Things and Artificial Intelligence Applications” during 08th to 12nd November 2021. I also request you to provide all the required facilities.

Thanking You,

Yours Sincerely

30/10/2021
HOD-CSE.

Principal

Vaageswari College of Engineering
KARIMNAGAR-505 527.

VAAGESWARI COLLEGE OF ENGINEERING

Beside L.M.D Police Station, Ramakrishna Colony, Thimmapur, Karimnagar
(Approved by AICTE New Delhi & Affiliated to JNTU Hyderabad)

Date: 05-11-2021

CIRCULAR

It is hereby informed to Department of Computer Science and Engineering that a five-day Faculty Development Program will be held on "Internet of Things and Artificial Intelligence Applications" from 08th November to 12th November 2021. All the teaching and non-teaching members should avail this opportunity to upgrade the technical skills.

Hence, all teaching and non-teaching members should attend the above FDP program without fail.

PRINCIPAL

Principal
Vaageswari College of Engineering
KARIMNAGAR-505 527.

Copies to:

- To circulate among all the staff members
- All the Notice Boards
- To all HODS
- Office file

FDP CONTENT:

This FDP is committed to cater to the faculty needs to update their knowledge in advancements in Artificial Intelligence (AI) & Internet of Things, and is being conducted by Vaageswari college of Engineering.

The main objectives of this program include:

To introduce fundamental of IOT and AI with its applications.
The program would help the participant to understand the key concepts and advance understanding on IOT and AI
To explore various research opportunities and challenges in the field of IOT, AI and its applications.

PROGRAMME CONTENT

Artificial Intelligence – Trends and Challenges.
Cloud Computing and its Services.
IoT Architecture and Protocols.
Overview of AI for IoT Connected Devices.
Data optimization using machine learning algorithm
Role of Data Science in Artificial Intelligence and IoT from Machine Learning to Deep Learning
AI enabled Wireless communication technologies for IoT Applications.
Applications and Challenges of Smart Sensor in IoT.

Five Day

Faculty Development Program

On

**Internet of Things and Artificial
Intelligence Applications**

Organized by

**Department of Computer Science and
Engineering**

**VAAGESWARI COLLEGE OF
ENGINEERING**

Karimnagar, Telangana- India

08th November to 12th November, 2021

ABOUT THE INSTITUTE:

Established in 2003, is one of the most prestigious society providing high quality professional education in Karimnagar district Telangana. The society is running multiple educational institutions like Vaageswari College of Engineering (2005), Pharmacy (2003), Pharmaceutical Sciences (2007), Management Sciences (2008). The society was established with a great vision to provide quality education on par with global standards to the students from all over India in general and in particular those from local and rural areas. Society is maintaining high standards so as to make them technically competent and ethically strong individuals who shall be able to improve the quality of life and become an asset to the economy of our country. The Society not only celebrates freedom of thought, cultivates vision and encourages growth, but also inculcates human values and concern for the environment and the society. The institution is awarded with Best Chapter of ISTE AP Section.

VISION:

"To develop the SreeVaageswari Educational Society into a center of excellence in imparting professional and technical education, to inculcate knowledge and power to the younger generation by providing high quality professional education on par with global standards and to instill high levels of discipline among student community making them ethically strong citizens capable of contributing to the development of society and mankind".

PROGRAMS OFFERED:

The college offers B.Tech. programmes in CSE,EEE, ECE, Civil and Mechanical Engineering. The college also offers MCA, MBA and M.Tech. in Computer Science and Engineering.

ABOUT THE DEPARTMENT:

The Department of Computer Science and Engineering was established in the year 2005 with an intake of 60 students in B.Tech.

The intake currently is 120 in B.Tech (CSE) Program. The department is also successfully running postgraduate program M.Tech (Computer Science and Engineering) with an intake of 36.

Computer Science and Engineering department is now home to several eminent and new faculty members, having rich experience in academics, industry and R&D.

The Computer Science and Engineering (CSE) department is dedicated in imparting quality education through well-designed and periodically upgraded curriculum in tune with the challenging software needs of the industry.

The Department's main objective is not only make the students excel in theory but also in experimental research through academic projects in various fields.

The Department regularly organizes several programs such as workshops, guest lectures, seminars etc. to impart state of art knowledge in different technologies to the students as well as faculty members.

Department is dedicated to advancing, disseminating and exploiting knowledge in engineering and technology

All employees can reach students for any of their problems, whether academic or non-academic. The department aims to technically develop students and make them mentally strong to meet future challenges. Consequently, the administration is trying to play the role of resources and technical leadership in development activities at the national level.

Five-Day Faculty Development Program

On

Internet Of Things and Artificial Intelligence Applications

(08/11/2021 to 12/11/2021)

SCHEDULE

DAY	SESSION-1 (9.30AM-11.00AM)	SESSION-2 (11.10AM-12.30PM)	SESSION-3 (1.30PM-4.00PM)	Resource Person
DAY-1 (08-11-2021)	Artificial Intelligence – Trends and Challenges. Cloud Computing and its Services.	IoT Architecture and Protocols.	Overview of AI for IoT Connected Devices.	Dr.Gulab Singh Chauhan
DAY-2 (09-11-2021)	Data optimization using machine learning algorithm	Role of Data Science in Artificial Intelligence	IoT from Machine Learning to Deep Learning	Dr.V.Bapuji
DAY-3 (10-11-2021)	AI enabled Wireless communication technologies for IoT Applications.	Applications and Challenges of Smart Sensor in IoT.	Research scope in AI and IoT	Mr.D.Srinivas Reddy
DAY-4 (11-11-2021)	Artificial Intelligence use cases for IoT Connected devices	Emerging trends in AI applications – case study for societal applications	IoT and AI applications in Agriculture	Dr.Gulab Singh Chauhan
DAY-5 (12-11-2021)	Integration of IoT and AI for healthcare systems	Hands on sessions on implementation of AI algorithms using python	Feedback & Valedictory (03.30PM to 04.30PM)	Dr.V.Bapuji

SPEAKER PROFILES

Dr. V. Bapuji is a Professor Department of Computer Science, Vaageswari College of Engineering - Karimnagar, Telangana-India. His current research interests include Computational Intelligence, Artificial Intelligence, Memetic Computing, Reinforcement Learning, AI Security and Vulnerability etc. He has published more than 120 refereed academic Papers/Articles, 4 Books and 6 Book Chapters. He has served as a regular reviewer, and program committee member of prestigious academic journals and conferences, such as IEEE Transactions on Vehicular Technology and Journal of Information Science and Engineering. He is a Associate member of IEEE, IEEE Computational Intelligence Society, IEEE Vehicular Technology Society and ACM, WASET, IAENG professional memberships.

Research Area:	Computational Intelligence, Artificial Intelligence, Memetic Computing, Soft Computing and Evolutionary Multitasking
Number of Published papers:	120
Scopus	08

Dr Gulab Singh Chauhan is an associate professor working in the Department of computer science and engineering Vaageswari College of engineering, Telangana India. He has a passion for learning new things and enjoy natural world. He was head of department in Vaageswari engineering College, Karimnagar. He did his Mtech computer science and engineering from Osmania University Hyderabad. Then he completed his doctorate in computer science from Bundelkhand University.

He has experience of overall 23 years in the field of teaching and research is currently working as a PG coordinator in the department of computer science and engineering.

ACTION TAKEN

The organizing committee has taken a decision to conduct the upcoming Faculty Development Programmes in a very effective and efficient manner. The committee also decided to invite speakers from very reputed organizations. It has been decided to make the programmes more of practical oriented by conducting hands-on sessions to the participants on IOT & AI.

Five-Day Faculty Development Program

On

Internet Of Things and Artificial Intelligence Applications
(08/11/2021 to 12/11/2021)

REPORT

A five-day Faculty Development Program on "IOT & AI" was organized by Department of Computer Science and Engineering, Vaageswari college of Engineering from 08th Nov to 12th Nov 2021 for the faculty of CSE Department.

Outcomes of the faculty Development program:

The objectives of the Faculty Development Program (FDP) are to equip participants with knowledge and skills in the following areas: leveraging IoT for sustainable solutions, understanding the future impact of AI and ML on industries and society, adopting design patterns and formal methods in software development

The objective of the FDP is to introduce fundamentals of data mining and machine learning & AI with realtime applications.

This FDP will be a very useful platform for faculty and researchers to update their knowledge

This FDP also focuses on exploring various research opportunities and challenges in the field of machine learning, AI and its applications.

Learn the various aspects of data handling and how information can be extracted from data.

Artificial Intelligence is a way of making a computer, a computer-controlled robot, or a software think intelligently, in the similar manner the intelligent humans think. AI is accomplished by studying how human brain thinks and how humans learn, decide, and work while trying to solve a problem, and then using the outcomes of this study as a basis of developing intelligent software and systems.

Artificial Intelligence is an interdisciplinary field that combines Machine Learning, Big Data, Cloud Computing, and Information Theory. The major advantage of machine learning is that it builds on prior experience, so machines are self-learning and can predict the future without error. It is a kind of decision-making approach that is applied in various domains like social media, health care, finance, etc. In Big Data and Cloud Computing, the volume of data is sustainable and increasing, which is processed with low power consumption with the help of machine learning. It is possible to support the next generation of smart grid by providing the platform that integrates, in addition to the communication

infrastructure, the AI and IoT support, providing a multitenant system, thanks to the future Massive Internet of Things (MIoT), one of the pillars of the 5G/6G network factory. Rapid development in Deep Learning, Artificial Intelligence (AI) and Machine Learning (ML) will give better results for future applications. This paper focuses on the trends and challenges related to AI is discussed.

DAY-1

(08-11-2021)

Dr.Gulab Singh Chauhan sir has explained the Internet of Things (IoT) represents a network comprising physical devices, vehicles, household appliances, and various objects integrated with sensors, software, and connectivity. This enables seamless data exchange and communication with other devices and systems through the internet. IoT devices can range from simple sensors that collect data to complex devices that after data collection can perform actions based on that data.

Integration of AI and IoT

The integration of AI and IoT has the potential to revolutionize the way we interact with technology. By combining the power of machine learning algorithms with the vast amount of data generated by IoT devices, businesses and individuals can gain valuable insights and make more informed decisions.

One of the key benefits of integrating AI and IoT is the ability to create intelligent systems that can learn and adapt to changing conditions. For example, smart homes can use AI algorithms to learn the preferences of their occupants and adjust the temperature, lighting, and other settings accordingly. Similarly, smart cities and factories can use AI to optimize production schedules and improve efficiency.

DAY-2

(09-11-2021)

Dr.V.Bapuji sir has explained: **Why use machine learning for IoT?** Machine learning can help demystify the hidden patterns in IoT data by analyzing massive volumes of data using sophisticated algorithms. Machine learning inference can

Principal

Five-Day Faculty Development Program

On

Internet Of Things and Artificial Intelligence Applications
(08/11/2021 to 12/11/2021)

supplement or replace manual processes with automated systems using statistically derived actions in critical processes.

In simple terms, data science focuses on the process of extracting, cleaning, and analyzing data to gain valuable insights, in contrast, AI involves creating intelligent systems that can carry out tasks autonomously, learn from their experiences, and enhance their performance as they gain more knowledge over time.

Algorithm optimisation is the process of improving the effectiveness and accuracy of a machine learning model, usually through the tweaking of model hyperparameters. Machine learning optimisation uses a loss function as a way of measuring the difference between the real and predicted value of output data.

DAY-3

(10-11-2021)

Mr.D.Srinivas Reddy sir has explained For example, smart sensors in industrial IoT environments can keep track of temperature and humidity, can log data for historical records and quality management, or can be used as triggers for alarms or process management in plants or warehouses.

Wireless communication technologies are paving the Internet of Things (IoT) ecosystem through a wide variety of wireless technologies for communications and computing protocols, services, and configuration. For instance, network functions such as firewalls, reside in the cloud to increase network agility and scalability while also enabling effective use of network resources. Similarly, mobility has advanced from an employee former indulgence to today's business stipulations. Mobile devices and smartphones have not only metamorphosed personal communications but also increased business yield and rejigged our society. Congruously, the IoT has been a presiding technological prospect from self-driving vehicles to wearable waldos. Wireless communications and computing are vital to IoT.

Five-Day Faculty Development Program

On

Internet Of Things and Artificial Intelligence Applications
(08/11/2021 to 12/11/2021)

DAY-4

(11-11-2021)

Dr. Gulab Singh Chauhan sir explained IoT with AI is used in many industries, from electrical infrastructure and smart cities to smart homes and manufacturing. While IoT focuses on devices connecting and communicating through the internet, AI empowers IoT devices to learn and evolve from their data and experiences.

IoT devices generate massive amounts of data. AI algorithms can analyze and make sense of this data, extracting patterns. With the help of AI, IoT devices can make real-time decisions without human intervention.

One common AI and IoT example is a smart thermostat that can adjust the room temperature based on the inhabitants' preferences and current environmental conditions. AI-driven insights can personalize user experiences and optimize operations. They are also increasingly being used to improve security.

DAY-5

(12-11-2021)

Uses of AI in healthcare – medical imaging, diagnosis & prevention

AI offers healthcare solutions that were unthinkable even a few years ago. One avenue of advancement is through machine learning algorithms that model and understand complex biological data. Within the field of medical imaging (which includes MR, CT, and ultrasound), AI offers opportunities to improve imaging accuracy, streamline acquisition, and even assist in highlighting abnormalities.

Beyond imaging, AI can aid in predicting diseases, diagnosing conditions, personalizing treatment, and discovering novel drug chemistry. Many experts see opportunities to increase healthcare facility operational efficiency, improve customer experience, and enhance patients' and providers' physical and mental health.

Perhaps the biggest opportunity for the use of AI in healthcare is through improved preventative care and early intervention. To enable this shift toward preventive care, we must monitor patients more regularly without overloading healthcare facilities and infrastructure. One way to do this is by transferring these capabilities out of the hospital and into the home.

Subject: Request Proposal to Conduct Five day FDP on “Python Full Stack Development”-

Reg.

Respected Sir,

In Accordance to Subject cited above I, Head of the Department of Computer Science Engineering here with request with this letter to permit us to conduct a Five day Faculty Development Program on “Python Full Stack Development in Computer Science Engineering” during **05-04-2022 To 09-04-2022**. I also request you to provide all the required facilities.

Thanking You,

Yours Sincerely

HOD-CSE.

FDP OBJECTIVES

This fdp provided comprehensive Python training for those who prefer to come up to speed on building Python capabilities. Python is a general-purpose and high-level programming language. You can use Python for developing desktop GUI applications, websites and web applications. Also, Python, as a high-level programming language, allows you to focus on core functionality of the application by taking care of common programming tasks.

PROGRAMME CONTENT

Python keywords, operators, statements, and expressions

Python data types like list, tuple, string dictionary, sets etc...

What is the Python -For Loop, what is Python used for, how Python switch the traditional syntax of code, and more.

Python files

Reading and Writing files in Python

Python Regular expressions

Python GUI Programming

Python CGI Programming

Tkinter, modules

Python modules and Functions

Creating Exceptions in Python

User defined Exceptions

Database connectivity to Python

Sqlite3 install on windows

Connections, Cursors in python

ABOUT THE COLLEGE

Vaageswari College of Engineering- The society was established by an eminent and educated personalities in the name of Goddess Saraswathi Devi, Sree Vaageswari Educational Society (SVES) during the year 2003 under the leadership of General Secretary Dr.Gandra Sreenivas Reddy Garu, who is a doctor in Ayurveda and a dedicated missionary and crusader in the field of education, is the spirit and force behind this reputed organization. The society was established with a crystal vision to produce professionals having scientific intellect, innovation and imagination. To be among the best of the institutions for engineers and technologists with attitudes, skills and knowledge and to become an epicentre of creative solutions. To achieve and impart quality education with an emphasis on practical skills and social relevance.

ABOUT THE DEPARTMENT

The Department of Computer Science and Engineering was established in the year 2005 with an intake of 60 students in B.Tech. It has become one of the strongest and most dynamic departments in the college and the computer science field with the distinguished and committed faculty members. The Computer Science and Engineering (CSE) department is dedicated in imparting quality education through well-designed and periodically upgraded curriculum in tune with the challenging software needs of the industry.

The intake currently is 120 in B.Tech. (CSE) Programme. The department is also successfully running post graduate programme M.Tech. (Computer Science and Engineering) with an intake of 36. Computer Science and Engineering department is now home to several eminent and new faculty members, having rich experience in academics, industry and R&D.

SPEAKER PROFILE

Name: Dr. N. ChandraMouli

Position: Associate Professor

Department: Computer Science and Engineering

Institution: Vaageswari College of Engineering, Telangana, India

Contact Information:

Email: cmnarsingojju@gmail.com

Phone: 9849750204

Office: Vaageswari College of Engineering, Karimnagar, Telangana, India

Educational Qualifications:

- Ph.D. in Computer Science from Sri Satya Sai University of Technology & Medical Sciences, Sehore
- M.Tech. in Computer Science and Engineering from JNTUH, Hyderabad

Professional Experience:

- 17 years of teaching and research experience
- Head of Department, Computer Science and Engineering, Vaageswari Engineering College

FDP Objectives:

1. Enhance pedagogical skills in computer science and engineering.
2. Incorporate innovative teaching methodologies.
3. Stay updated with the latest advancements in technology.
4. Foster interdisciplinary collaborations.
5. Develop effective mentoring techniques for students.

Expectations from FDP:

- Gain insights into modern teaching strategies.
- Network with peers and experts.
- Acquire resources for curriculum enhancement.
- Refine assessment techniques.
- Explore avenues for research funding.

Mr. Md. Sirajuddin completed his M.Tech from Jawaharlal Nehru Technological University. Currently he is working as an Associate Professor at Vaageswari College of Engineering. His research interests include Wireless Sensor Networks.

K. Sridhar Reddy is an accomplished Associate Professor in the Department of Computer Science and Engineering at Vaageswari College of Engineering, Karimnagar. With a robust academic background, he pursuing a Ph.D. in Computer Science and Engineering from Glocal University, Saharanpur, UP, with a thesis focused on "Design and Evaluation of Question Answering System using Deep Learning Technique of Artificial Intelligence."

His expertise spans over 16 years in academia, with significant contributions in teaching, research, and administrative roles. Dr. Sridhar has a diverse range of teaching experience covering various subjects such as Programming, Data Structures, Object-Oriented Analysis, Information Security, and more. He has also supervised numerous UG and PG projects.

A prolific researcher, K Sridhar has published extensively in reputed international journals and conferences, particularly in the fields of Artificial Intelligence, Mobile Commerce Security, and Computer Networks. His research work demonstrates a keen interest in exploring innovative solutions using advanced technologies.

Apart from his academic pursuits, K. Sridhar has actively engaged in professional development activities, participating in numerous workshops, training programs, and conferences.

ACTION TAKEN

The organizing committee has taken a decision to conduct the upcoming Faculty Development Programmes in a very effective and efficient manner. The committee also decided to invite speakers from very reputed organizations. It has been decided to make the programmes more of practical oriented by conducting hands-on sessions to the participants in learning python full stack development.

Five-Day Faculty Development Program

On

Python Full Stack Development

(05/04/2022 to 09/04/2022)

REPORT

5 Day Faculty Development Program on "Python Full stack Development" was organized by CSE Department, Vaageswari college of Engineering from 05th to 09th April 2022 for the faculty of CSE Department. Several faculty members of the Department actively participated and gained useful information from all the sessions.

This fdp provided comprehensive Python training for those who prefer to come up to speed on building Python capabilities. Python is a general-purpose and high-level programming language. You can use Python for developing desktop GUI applications, websites and web applications. Also, Python, as a high-level programming language, allows you to focus on core functionality of the application by taking care of common programming tasks.

Outcomes of the Faculty Development Program:

Upon successful completion, the participants are expected to get a fair amount of fundamental knowledge on Python Programming. The participants will be able to understand data handling, analysis and implementation using Python built-in Libraries.

In his welcome speech, he highlighted the importance and objectives of organising this faculty development programme. In his speech, he added that Python is a widely used programming language used by several big companies like Google, Pinterest, Instagram, Disney, Yahoo!, Nokia, IBM, and many others. Also, he highlighted a few statistics pertaining to the job opportunities available for Python developers.

In his inaugural speech, worthy Dr.Ch.Srinivas, Principal, VGSE, thanked the management and secretary for conducting the Faculty Development Programme on "Python Full Stack Development". He highlighted the importance of learning general-purpose programming languages such as Python, Java, and Ruby. He emphasised that technical skills among teachers can be built only through faculty development programs.

(05/04/2022 to 09/04/2022)

Technical Sessions:

Day 1 (05-04-2022)

The resource person of this session, Dr.N.Chandramouli, started his lecture on Introduction to Python Programming with its history. He elaborated on the types of programming languages and has given examples of use cases for each programming language. He further added why Python is ideal for beginners who want to learn a programming language. He briefed the discussion about the importance of using the Python programming language in Deep Learning and Artificial Intelligence-based applications.

In his lecture, sir demonstrated the need for different data types to handle various real-world problems. He explained the two important data types known as List and Tuple with suitable use cases. Code snippets were executed by him in Google Collab to show the usefulness of the above-mentioned data types. Methods relevant to lists and tuples were briefly discussed. He explained the significant use cases for the Python data type called dictionary in his lecture. He also gave hints to the participants about the correct usage of the dictionary methods.

He has given a list of scenarios to help participants understand when to use Python dictionaries

Day 2 (06-04-2022):

In his lecture, Mr.K.Sridhar Reddy gave insights to the participants about the usefulness of handling files and exceptions. He has shown the participants how to create a text file and write and read the contents thereof. He also demonstrated two very important features, namely exception handling and assertions, to handle any unexpected error in the Python program and to add debugging capabilities to them.

Finally, he has given a brief introduction to the most used Python libraries for data analysis, namely Tensorflow, Numpy, Pandas, and Scipy.

Python Full Stack Development

(05/04/2022 to 09/04/2022)

Day 3 (07-04-2022):

In his lecture, Mr.Md.Sirajuddin stated that "Modular programming (also referred to as modular architecture) is a general programming concept. It involves separating a program's functions into independent pieces or building blocks, each containing all the parts needed to execute a single aspect of the functionality. Together, the modules make up the executable application program. "He has shown the participants how to create functions in Python in the simplest way possible. At the end of the session, all participants were able to understand the reusable nature of functions and write effective code for solving the problem.

Day 4 (08-04-2022)

In his lecture, Dr.N.Chandramouli highlighted the powerful features for database programming offered by Python. The various types of databases supported by Python, such as SQLite, MySQL, Oracle, Sybase, PostgreSQL, etc., were briefly discussed. Then he moved on to talk about different types of database statements, namely Data Definition Language (DDL), Data Manipulation Language (DML), and Data Query Statements. Finally, he demonstrated to the participants how to use Python DB-API to create an interface between Python and a database.

Day 5 (09-04-2022)

In his lecture, Mr.K.Sridhar Reddy discussed the different paradigms that exist in the world of programming languages. Also, he added that "Python is a multi-paradigm programming language. It supports different programming approaches. He compared object and procedural-oriented programming with suitable scenarios. He gave a brief introduction to the building blocks of OOPS in Python like polymorphism, encapsulation, inheritance, and data abstraction with examples of real-world problems.

"Why Is Python Good for Research?" and brainstormed the ideas of the participants. He also added that "A variety of people use spreadsheet programmes like Microsoft Excel or Google Sheets to work with huge amounts of data.

These are powerful tools, but they have serious limitations, like problems with analysing datasets above a certain size. limitations that are not a problem for Python—one of the most popular and fastest-growing major programming languages in the world." He also discussed Python in conjunction with the Jupyter Notebook, which is very useful for data science, machine learning, and research. He told the participants about how it allows people to write extremely expressive code.

Feedback from the Participants:

The feedback of the participants was very positive and motivational for the organizers. The participants felt very happy about conducting the FDP on the latest trends in research as well as industry. They have learned a lot about Python programming in theoretical and practical ways. They said that this programme was very useful and helpful for them in their research work and in guiding the projects for the students. Upon successful completion, the participants are expected to get a fair amount of fundamental knowledge on Python Programming. The participants will be able to understand data handling, analysis and implementation using Python built-in Libraries.
