To

The Principal,

Vaageswari College of Engineering.

Respected Sir,

Sub: Requisition to get permission to conduct Certification Course on “**Recent trends in technologies for innovations**” in our Campus for our 02<sup>nd</sup>, 03<sup>rd</sup>, and 04<sup>th</sup> year Electrical and Electronics Engineering students from 09<sup>th</sup> Feb. 18 – 15<sup>th</sup> Feb. 18.

It is our privilege to inform you that we EEE Department is planning to conduct a Certification Course on “**Recent trends in technologies for innovations**” for our 02<sup>nd</sup>, 03<sup>rd</sup>, and 04<sup>th</sup> year Electrical and Electronics Engineering students from 09<sup>th</sup> Feb. 18 – 15<sup>th</sup> Feb. 18.

Artificial intelligence is poised as a tool of choice for businesses and solution providers. As is often seen with social media, AI, combined with machine learning, deep learning and neural networks, can be a powerful combination. Businesses can use AI to achieve cost-saving benefits, streamline workflows, improve the customer experience, enable more efficient communications through chatbots, increase customer satisfaction, and provide insight into purchasing behavior.

Additionally, machine learning can analyze large datasets and provide scaled insight. We are currently just scratching the surface of how machine learning and AI can work together to enable businesses. Current applications provide huge growth potential for solution providers who can fully understand the capabilities and functionality of AI to tailor solutions to meet business demands.

In this connection we request you to consider our request and grant permission to conduct the above said program. Hoping you early response for this approval.

Thanking you Sir,

Yours faithfully

To

The Principal,

Vaageswari College of Engineering.

Respected Sir,

Sub: Requisition to get permission to conduct Certification Course on **"Applications of Artificial intelligence in electrical engineering"** in our Campus for our 02<sup>nd</sup>, 03<sup>rd</sup>, and 04<sup>th</sup> year Electrical and Electronics Engineering students from 09<sup>th</sup> Sep. 17 – 16<sup>th</sup> Sep. 17.

It is our privilege to inform you that we EEE Department is planning to conduct a Certification Course on **"Applications of Artificial intelligence in electrical engineering"** for our 02<sup>nd</sup>, 03<sup>rd</sup>, and 04<sup>th</sup> year Electrical and Electronics Engineering students from 09<sup>th</sup> Sep. 17 – 16<sup>th</sup> Sep. 17.

Many areas of applications in power systems match the abilities of expert systems like decision making, archiving knowledge, and solving problems by reasoning, heuristics and judgment. Expert systems are especially useful for these problems when a large amount of data and information must be processed in a short period of time.

Recent progress in areas like machine learning and natural language processing have affected almost every industry and area of scientific research, including engineering. Machine learning and electrical engineering professionals leverage AI to build and optimize systems and also provide AI technology with new data inputs for interpretation. For example, engineers build systems of connected sensors and cameras that ensure that an autonomous vehicle's AI can "see" the environment. They must also ensure that the information is communicated from these on-board sensors at lightning speed, as any delay in processing could result in a severe accident.

In this connection we request you to consider our request and grant permission to conduct the above said program. Hoping you early response for this approval.

Thanking you Sir,

Yours faithfully

To,

The Principal,  
Vaagesawari college of Engineering,

Sub: Requisition: To conduct add-on certificate program on **"A Practical Approach on GST"** for our management students from 01-11-2017 to 18-11-2017-reg.

It is pleasure to inform you that we Business Management Department is planning to conduct a certificate program on **"A Practical Approach on GST"** for our Management Students from 01-11-2017 to 18-11-2017.

The introduction of GST in India is a significant step towards the reform of indirect taxation. Combining several state and central taxes into a single tax has overcome the issue of double taxation and led to the establishment of a common national market. From the consumers' point of view, the advantage is in terms of a reduction in the overall tax burden on the goods and services. Successful implementation of GST also helps in giving a strong signal to foreign investors about India's unmatched ability to support businesses in different fields. With more transparency and efficient compliance, GST has boosted India's GDP and further helped in cheaper and faster movement of goods within the country with a uniform taxation structure. Furthermore, GST has also led to a reduction in prices as manufacturers and traders now don't need to include taxes as a part of their cost of production.

After the completion of the Programme, Students will be able to acquire knowledge on indirect taxes, GST and Customs Duty. Understand the impact of latest regulations and prepare for adopting the changes.

To enable the students to acquire knowledge about GST and its appeals. To enable the students to apply their knowledge about Procedure for GSTIN and their registration is essential for them.

In this connection, I request you to grant permission to conduct the above said course. I am looking forward to hear from you soon regarding this approval. This is for your information and kind approval.

Thanking you sir,

Yours faithfully

It is pleasure to inform you that the Department of Mechanical Engineering is planning to conduct a Add on/certificate course on "Finite Element Modeling using Hypermesh"

This is an introductory course on Finite Element Modeling using Hypermesh enables participants to work on Hypermesh 12.0 software, a computer aided engineering (CAE) simulations software platform. The training enables the trainees to create finite element models for analysis and prepare high-quality meshes in an efficient manner. This program offers the skills needed to work with geometry editing tools for preparing CAD models for the meshing process. During the Hypermesh training, the attendees will have knowledge about the Batch Meshing technique that facilitates users to mesh several files in the background to match the standards set by users.

In this connection, I request you to grant permission to conduct the above said course. I am looking forward to hear from you soon regarding this approval. This is for your information and kind approval.

**Academic Year:** 2017-2018

**Class & Semester:** ME III Year II Semester & IV Year II Semester

**Title:** Finite Element Modeling using Hypermesh

**Duration:** 30 Hours (3 hours per day) during to 13-02-2018 to 26-03-2018

**Name of the Faculty (Coordinator):** N.Srinivas

**Number Students Completing the Add On/Certificate Course:** 114

### Summary Report with Outcome:

Hypermesh training course enables participants to work on Hypermesh 12.0 software, a computer aided engineering (CAE) simulations software platform. The training enables the trainees to create finite element models for analysis and prepare high-quality meshes in an efficient manner. This program offers the skills needed to work with geometry editing tools for preparing CAD models for the meshing process. During the Hypermesh training, the attendees will have knowledge about the Batch Meshing technique that facilitates users to mesh several files in the background to match the standards set by users
